Abstract: Correlating two people implies correlating two different temporalizations. Thus, the binar structure ME – YOU emerges, a dynamic indivisible ONE, a co-belonging and a mutual confusion. The new entity ME – YOU lives equally in both of them. The OTHER ONE, the external body existence, modifies his/her body feature and spirit by means of the look gesture. Getting out of the self can only be achieved by both, aiming at ONE. The western philosophy of erotism arises from this path to the ONE of the ancient Greek philosophy.
